CAREER OBJECTIVE

- Seeking a successful career as a Full Stack Java Developer. Proficient in both front-end and back-end technologies, eagerly looking forward to work at your esteemed organization which offers challenging assignments and career growth prospects.

PROJECT(S)

PAYMENTS CLI & WEB APP USING | JAVA | MySQL | SERVLETS | JSP | JAVASCRIPT | HTML | CSS | JavaScript | BOOTSTRAP

- I've built a 'Payment CLI (Command Line Interface) & Web App that allows users to process payments directly from this application. The primary function of this application is to process payments. This could involve register user, add bank account, add money to wallet, etc.,

COMPARISON OF SEVERAL ML ALGORITHMS FOR EFFECTIVE HEART DISEASE PREDICTION USING | PYTHON | MACHINE LEARNING | PANDAS | DATA MINING ALGORITHMS

- I've built a 'Heart Disease Prediction System' to predict whether the Patient is likely to be diagnosed with a heart disease or not, Using the medical history of the patient. I've used different ML Algorithms, Python for accurate result in this project.

ACHIEVEMENTS

- Participated in a Workshop "Skeletal System of Machine Learning" conducted in my M.C.A engineering college.
- Participated in Vizag Marathon 2022, Visakhapatnam.

CERTIFICATIONS

- Certified Full Stack Java Developer Course in Tech Mahindra SMART Academy for Digital Technologies, Visakhapatnam.
- Certified Cisco Networking Academy, Introduction to Cybersecurity Course, Earned: March 2024.
